

Parent to Parent

*Some things parents have said
about our Parent to Parent
service...*

*It was very helpful – I felt so
isolated and knowing other
parents were going through
the same thing was a blessing*

My daughter had just
been diagnosed – I just
needed to know more
and it was so nice to
talk to someone

It was support when I
was feeling down, and
I was able to offload
onto Parent to Parent,
not my family

It was really useful talking
to someone who knew what
I was talking about. She
just listened mostly, and
she set my mind at rest.

*I'm more confident
now when I talk to
the consultant*
